### lge cautions on poor handling of water

By Mustafa Abubakar

he Coordinator, Hydrogeology Teaching and Research Group, Department of Geology and Mineral Sciences, University of Ilorin, Dr. Olusegun Omoniyi Ige, has lamented the manner in which human beings, especially Nigerians, handle water, calling for caution.

Dr. Ige, who gave the advice last Tuesday (April 5, 2022) while speaking with UNILORIN BULLETIN, disclosed that there are two major types of water bodies, the surface and groundwater. He said that water is the first thing to secure when having contact with land and must be properly secured.

According to the don, "The surface water is seasonal, prone to pollution and not good for consumption while the groundwater is concealed under the ground, purer than the surface water but requires the expertise of geologists to search for".

Dr. Ige said that groundwater is available everywhere though at different depth, quantity and quality but several factors including manners and knowledge of exploration could make it unavailable.

He said, "It is unfortunate that human beings think they take the issue of water important but not. It is the first thing to be secured before the purchase

Dr. Ige

of land for construction of factories, hostels, private residences, etc. even the lawyer, real estate manager, etc, would triple their gains if they secure groundwater zones within the land/estate they want to sell/buy. Worse of this ignorance to the importance of water is the 'penny wise, pound foolish' syndrome".

He said that on March 22, 2022, the whole world celebrated the World Water Day (WWD), a day dedicated to the celebration of water, adding that such celebration signals the importance of water to every entity (living or dead) on earth.

According to the renowned

Geologist, "Water is next to blood in the three major anchors of man's existence: that is blood, water and air. Water is needed at birth and death of man, and was the only thing existing on earth before God started creation".

Dr. Ige said, "I have seen people (including elite) running away from spending less than N50,000 to locate a point to be drilled for a borehole but rather raising fences and other structures with millions of Naira, eventually the fence will be pulled down when the need for water comes knocking. Then the fence will be pulled down, the borehole will be drilled and the fence will be restored. Who is losing?"

The don pointed out that another strange punishment is that many choose to buy water tankers, adding that "a tanker load of water is N15, 000 now, which can only last one week. In one month, about N60, 000 which amounts to N720, 000 in a year. With N720, 000 today, you will drill a borehole that will serve your purpose as long as you live".

"Some of these factors are effect of season, geological setting (rock type in the area), political will (Government), client's wrong expectations, inaccessibility to site, quackery-who handle your work? Compromise for quality by client and inability to ask questions by client", he said.

## Early diagnosis, treatment best for TB - Odunola

#### By Tajudeen Babamale

he Director of Unilorin Health Services, Dr. Rasheed Odunola, has identified early diagnosis and treatment as the most potent way to curb the spread of tuberculosis (TB). Dr. Odunola, who made this observation while featuring recently on 'Ko tan sibe', a current affairs program on UNILORIN 89.3 FM, appealed to the people to immediately visit the hospital for proper diagnosis and treatment once they observe symptoms such as unexplained weight loss, fever, persistent cough, general feeling of fatigue, and whenever they are exposed to TB.

The medical expert explained that a person may develop this preventable disease after inhaling

Dr. Odunola

Mycobacterium tuberculosis which can be spread to others through the air droplets when a person with TB talks, sneezes, coughs, laughs, or spits.

Dr. Odunola, who is also a

member of the Governing Council of the University of Ilorin, however, encouraged TB patients to protect their family, friends, and loved ones by staying at home and avoiding sleeping in the same room with others, ventilating the room, using a tissue to cover their mouth anytime they sneeze or cough and wearing a face mask when around other people, especially during the first three weeks of treatment.

While appealing to cigarette smokers to quit smoking, the astute medical professional explained that smoking cigarettes and other forms of smoking increases the risk of developing TB, adding that such a habit makes treatment harder.

## **Academic Support Services honours 3 corps members**

#### By Mustafa Abubakar

he Examinations and Records Unit of the Academic Support Services, University of Ilorin, has honoured three corps members of the 2021 Batch 'A' (Stream 1) who have completed their one year National Youth Service programme in the Unit.

At the send-forth programme, held on Friday, March 25, 2022, the Deputy Registrar, Academic Support Services (Exams and Records), Mrs. Khadijah W. Garba, appreciated the honourees for their selfless contributions in the Transcript, Records and Verification Units where they were attached.

Mrs. Garba said that with the various experiences that the corps members have gained, coupled with their academic attainments, they are set to soar to the highest level of success.

In her remarks, the Head of Verification and Record Unit, represented by Mrs. Temilolu Akintayo, said that the corps members served meritoriously and satisfactorily during their service year.

Mrs. Akintayo stressed that the knowledge gained by the corps members while working in the Unit will be useful for them to face the challenges of the wider world.

On his part, the Head of the Transcript Unit, Mr. A. K. Sanni, pointed out that the honourees have performed

Staff of the Exams and Records Unit of the Academic Support Services with the corps members during the send-forth

excellently and diligently during their stay in the Academic Support Services, particularly in the Transcript Unit.

While wishing them all the best in their future endeavours, Mr. Sanni said that the corps members have "convinced me that the future is still very bright for Nigeria if we have people like them in the country".

Also commenting, the Head of the Certificate Unit, Mrs. Eunice Bajomo, enjoined the

honourees to remain honest, hardworking and always have the fear of God. She then wished them success in their chosen endeavours.

In their response, the outgoing

corps members, Yeye Esther Oluwatoyin, Asifat Faizat Oladunni, and Akintomiwa Oluwapelumi Ojo, appreciated the Unit for the healthy and sconducive working environment they enjoyed during their stay. They further expressed their joy and happiness to have worked with the various staff of the Unit.

Other members of staff present at the send-forth included Mr. Bashir, Mr. Nagode, Mr. Lawal, Mrs. Abidemi, Mrs. Eniola, Mr. Baba, Mr. Ishola, Mr. Anafi and Mrs. Sadiku, among others.

Highlight of the event included presentation of parting gifts to the three corps members.

## Unilorin alumni tasked on progress, stability of alma mater

By Abubakar Imam

e m b e r s o f th e UNILORIN Branch of the University of Ilorin Alumni Association have been urged to show greater interests in the progress and stability of the institution through effective participation in the activities of the Alumni Association, saying that such a disposition would surely put the Branch in a good stead to play the much desired pivotal role in all matters concerning members of the Association.

This advice was one of the key resolutions at the general meeting of the University of Ilorin Branch of the Association, which held last Wednesday (April 6, 2022) at the Lecture Theatre of the Faculty of Communication and Information Sciences.

The desire to review and improve the current status of the University of Ilorin Branch of the Association was particularly and extensively discussed as a decision was taken to ensure the compilation of membership list in a way that would capture the names and status of members of the Association across various Faculties, Centres and Departments.

It was also decided that to ensure a greater sense of belonging and consciousness, the Association at the branch level would ensure the mobilisation and formation of units across all sectors of the University.

The Association appreciated the existing groupings

Prof. Adeleke

of the UNILORIN Branch, which have been adding significant value to it, particularly the Medical alumni group, the Law alumni group and the Geography and Environmental Studies alumni group with thumb up for their respective coordinators.

The meeting, which was presided over by the Chairman of the Branch, Prof. B. L. Adeleke, expressed profound gratitude to members who had rendered selfless services to the Association at any or all of the three layers of

the Association over the years.

The meeting also reviewed all that transpired at the Special National Congress of the Association, which took place on Saturday, March 26, 2022.

The Association commended the Vice-Chancellor of the University, who is also the Chairman of the Committee of Vice-Chancellors of Nigerian Universities (CVNU), Prof. Sulyman Age Abdulkareem, and members of his management team for providing what it described as "serene and conducive environment for both staff and students of the University".

It also expressed deep gratitude to the Dean of the Faculty of Communication and Information Sciences, Prof. Lukman Adesina Azeez, and the Faculty's Sub-Dean, who, despite not being members of the Association, made the facility available for the meeting and also ensured that everything went well.
